

Enrolment Across Schools

The Enrolment Across Schools report provides a high level view of a school's enrolment trends across years.

For executive directors and directors of public schools, the report provides the same facility but for all schools within their Principal Network.

How will these reports benefit me?

The Enrolment Across Schools report can be used to gain an insight into trends and any significant shifts in student movements at your school or in your area.

Page 1 – By School – this report displays data for each school over calendar years.

Page 2 – All Schools – displays data for primary, SSP and secondary schools in each Principal Network.

What does the Enrolment Across Schools report provide?

This two page report presents information on:

FTE Enrolments by Calendar year and School Name (By School)

- This line chart compares enrolment trends over the past 6 years for all schools in a network. It is best understood when filtered by school type so that schools in the same category, e.g. secondary schools, can be compared.

FTE Enrolments by Calendar Year and Scholastic Year (By School)

- This stacked bar chart compares enrolment trends for a network or single school. It can be used to pinpoint bulges, e.g. if there are more students in younger

years this can indicate an influx of young families to the area or if there are low numbers in Years 11 and 12 this can indicate a low completion rate.

FTE Enrolments by Calendar year (All Schools)

- This line chart display enrolment trends over the past 6 years for all schools in a network or a single school only

FTE Enrolments by Calendar Year and Scholastic Year (All Schools)

- This stacked bar chart displays enrolment trends for all schools in a network or a single school. It can be used to pinpoint bulges at the network level, for example a larger than usual Kindy cohort will need to be catered for at each educational stage.

The following slicers can be used to filter the data:

- **School Type**
- **Gender**
- **Aboriginality**

How can I use the Enrolment Across Schools report to support my school self assessment?

This supports schools to develop school programs to address enrolment trends such as increases or decreases in enrolments over time. This will allow schools to plan for future enrolment projections.

What should I look for?

- Each visualisation provides a different way to understand enrolment trends at your school or network over time.

Where does this data come from?

ERN

How frequently is data updated?

Daily (overnight)
