

Transport Authorisation Template and Samples

Introduction

When services provide or arrange transportation of children, or organise excursions, it's crucial to ensure compliance with all regulatory requirements, including for authorisations.

This document has been prepared to assist approved providers, nominated supervisors and educators to improve their understanding of the information required in transport authorisations and excursion authorisations under the *Education and Care Services National Regulations*.

Services must ensure that children are not transported by the service or on transportation arranged by the service, or taken outside the service premises on an excursion, unless written authorisation has been provided. [Regulation 102D](#) provides the requirements for, and information that must be included in, transport authorisations. [Regulation 102](#) provides the requirements for, and information that must be included in, excursion authorisations.

Written authorisations for transport and excursions are important as they:

- Clarify expectations and processes for all parties
- Contain necessary details to allow families to provide informed authorisation
- Give you families' formal authorisation to take children outside the service premises.

Written authorisations also provide the opportunity to share road safety information and best practice with families. Services can use authorisations to highlight how they keep children safe during transportation/excursions:

- As passengers; using correctly fitted age/size appropriate child car seats and booster seats.
- As pedestrians; holding hands or keeping children close while talking with them about how they are keeping safe together.

Consider including the following information in your written authorisations for families where relevant.

- Our service recognises that adults are always responsible for the safety of children in and around vehicles. We consider transportation/excursions as a great opportunity to develop children's ongoing road safety understandings.
- Before, during and after transportation/excursions are used as times to talk with children about road safety and how we keep safe by holding hands with an adult, using marked crossings, avoiding walking near other vehicles, and using appropriate restraints in vehicles.
- If using transport such as buses, trains, light rail or ferries, include information about the safety practices that will be implemented and emphasised before, during and after the journey.
