

FASTstream

Salary reimbursement

FASTstream participants will be placed in schools in above establishment positions determined by the participant's FASTstream current phase and the executive entitlement of the school.

Schools will be reimbursed for the full cost of the FASTstream participant.

The FASTstream participant will be appointed to the school in a temporary above establishment position. The participant will appear in OMSEE4 as a supernumerary position. Phase 1a and 1b participants will appear as classroom teachers, phase 2 participants as assistant principals/head teachers and phase 3 participants as deputy principal/assistant principal/head teacher/teaching principal, depending on the executive entitlement of the school. This will not affect the school's staffing entitlement or principal classification.

The full cost of the FASTstream participant will be charged to the school fortnightly, and reimbursed quarterly.

If a school chooses to place a FASTstream participant in a higher duties position, either to fill a vacancy or in an additional position, the school will need to fund the higher duties allowance.

Reimbursement process

Schools will be reimbursed for the full salary of the FASTstream participant's appointed position.

The cost of the FASTstream participant will be charged to the school each pay period and will be visible in the SAP Employee Level Salary Cost Report.

The full cost of the participant will be reimbursed to the school on the following schedule by budget adjustment and these will be visible in the eFPT Allocation Detail Report, with the adjustment reason: "FS Salary – {participant name}" and the contact details: FASTstreamprogram@det.nsw.edu.au

Quarterly reimbursement

First quarter salaries (Jan–Mar)	March
Second quarter salaries (Apr–Jun)	June
Third quarter salaries (Jul–Sep)	September
Fourth quarter salaries (Oct–Dec)	*January

*January of the following year

Schools have requested this reimbursement to take place in the following year.

Any school that wants this reimbursement in the current calendar year should request this by emailing FASTstreamprogram@det.nsw.edu.au by October 31 each year.

Entering the FASTstream participant into eFPT

As the FASTstream participant has been appointed to the school in a supernumerary position and appears in OMSEE4 the participant will appear in the Entitlement – 6100 tab under Staff Planning in eFPT. For any above establishment positions, including FASTstream, that are not funded from entitlement, edit the plan line and enter the correct flexible funding sources. When you save the plan, the flexible funding plan line(s) will be saved to the Flexible 6100 tab.

As these budget adjustments are provided in arrears, you may need to add a plan for an above establishment position before you receive the budget adjustment. Use the link below to check all considerations for how to handle this. If you decide to add zero FTE plans until the funds are actually received, you will need to update your plans every time you receive a budget adjustment and amend the end date as appropriate.
