

IT Services & Support

Application Browser Compatibility Matrix

The following matrix shows the browser compatibility status for DET applications. It shows whether a particular browser is unsupported, compatible or certified for a particular application.

The information comes directly from the application teams supporting these applications and the QA Team, and will be maintained and published regularly (e.g. half-yearly). More applications are also gradually being added.

If you have any issues or suggestions, please contact the [ITD Enterprise Architecture Group](#).

Legend	
X	Unsupported
✓	Compatible (Best effort support)
✓✓	Certified and supported
	Unknown
