

## Effective resourcing implementation and progress monitoring - reflection prompts

What staffing and flexible funding allocations will be linked to strategic directions? How can we be sure that we are allocating funds to activities throughout the year? Have we considered our resourcing needs over the four years of the SIP?

How have the resources allocated to our school been strategically allocated to ensure maximum impact on students?

Have we developed our evidence-based activities in such a way that evidence of impact can be determined?

Have we considered other funded activities not linked to strategic directions that should be included in our annual report? What are our processes for evaluating the impact of these on student learning and wellbeing?
