

## Resourcing reflection questions to guide SIP 'Annual reflection'

To what extent were annual needs-based funding allocations fully expended to benefit this year's students?

Were our resources used to address student need and lift student outcomes as planned?

Consider if future resourcing will require adjustment based on evaluation findings.

Do we have effective processes in place to ensure resources are used to drive improved student outcomes in alignment with our plan?

What extent were the planned/allocated resources consumed to support achievement of the annual progress measures?

Consider to what extent the annual progress measures for equity groups have been achieved for your school.
