

**APPENDIX 8**

# Risk management strategies

See examples in [Appendix 9](#) to assist with developing strategies to avoid exposure to known allergens. The principal or their delegated executive staff must exercise his or her professional judgment to endorse strategies that they believe are appropriate to the individual student. As part of that process consideration should be given to the extent to which the student understands and is able to participate in a proposed strategy. Reasons for decisions made should be documented.

Student name: \_\_\_\_\_

Student number: \_\_\_\_\_

SEVERE ALLERGIES: .....

Asthmatic?  Yes\*  No

\*High risk for severe allergic reaction. In an individual with asthma, who is also at risk of anaphylaxis, the adrenaline autoinjector should be used first, followed by asthma reliever medication, calling an ambulance, continuing asthma first aid and following the emergency response plan (the ASCIA Action Plan for Anaphylaxis).

Other confirmed allergies:
