

2019 School to Work highlights

The School to Work Program (STW) prepares young people to face the challenges and opportunities of future trends in the world of work. The program lays the foundation for young people to be enterprising citizens engaged in lifelong learning and making positive career transitions. Read the full overview [here](#).

In 2019

78% of Years 9-12 enrolments
(140,000 students)

28% of Years 7 and 8 enrolments
(29,000 students - up from 24%)

participated in the School to Work (STW) Program

98%

of schools actively engaged parents, caregivers and elders in supporting their child's career development and transition planning

97%

of schools reported they provided opportunities for students to participate in work experience

90%

of schools report teachers are assisting students to identify the transferable skills they are using in class

169,000

(up from 163,300) students in Years 7-12, were involved in career development, transition planning and related activities through the School to Work Program.

Schools use the **School Career Development Service Benchmarking Resource (CICA benchmarks)** to inform the direction of their School to Work Program

Schools use the **STW report** for their annual school report, preparing newsletters for parents, carers and the community and for the school's website
