

Prepare to work in the Renewable Energy Industry

Microskill

Explore the growing and dynamic renewable Energy Industry and the diverse career opportunities it offers.

Renewable energy will play a crucial role as Australia transitions from fossil fuels to sustainable energy sources to reach net zero by 2050.

Course description:

This introductory course is designed for individuals who want to learn more about the renewable energy industry's various technologies and diverse career opportunities. It explains what renewable technologies are, how they work, where they are located and why, and the various roles, training requirements and career opportunities for anyone seeking a new and exciting career pathway in the renewable energy industry.

Learning outcomes include being able to:

- Outline the future of the energy industry in Australia and the transition from fossil fuels to renewable energy
- Recognise the environment, working conditions and lifecycle of a Renewable Energy Zone
- Identify the technologies that make Australia's renewable energy industry
- Evaluate the long-term career opportunities across the various industry sectors and project stages and how to pursue them
- Take action to join the renewable energy industry
