

Bonnyrigg High School virtual reality immersion experience facilitator viewing guide

Viewing the virtual reality (VR) immersion experience is most effective with a small group of colleagues.

Information to consider before commencing the experience

Review [Bonnyrigg High School lesson overview](#). Based on this information and the school context, what do you think the learning in this experience would look like? Consider the space, communication, the [learning modes](#), and the role of the teachers and students.

Pause and discuss the following questions during the experience

- How is the space being successfully transformed during the lesson to suit the targeted [learning modes](#)?
- How are teachers using collaboration to facilitate student learning?

Reflect on the following after viewing the VR experience

- How could you transform a learning environment in your school with minimal financial outlay, as this school has?
- In your own learning space, create furniture settings that can activate each of the eight [learning modes](#). Photograph the settings and share with your colleagues via Instagram, Yammer or Twitter so they can try your ideas.

Extension

Read this article on [updating your space on minimal a budget](#) and complete a [reading circle activity](#).
