

Cycling School Bus Information

Definition

A *Cycling School Bus* is a group of students who cycle to and from school along a set route, accompanied by supervising adults. One adult is at the front of the 'bus' while the other adult supervises at the rear. The *Cycling School Bus* picks up or drops off 'passengers' at designated stops on the way to and/or from school.

Background

It is recommended:

- Intended audience for this document P&C, volunteers and principals
- The decision to implement a Cycling School Bus is made in consultation with the school community.
- Careful consideration in planning is advisable before implementation.
- Implementation and management are done by the P&C, with school leadership consultation.
- Your local council's Road Safety Officer and Police Youth Liaison Officer may be able to provide support in planning / implementing at your school.
- Regular reviewing and evaluating of the *Cycling School Bus* by parents, students and volunteers should be conducted to check for ongoing safety and risk management.

Responsibility

It is recommended:

- Implementation and management of Cycling School Bus programs are done by the P&C/parent or volunteer group.
- The group organising the program are responsible for regularly reviewing and evaluating the *Cycling School Bus* program to check for ongoing safety and risk management.
- Consultation with the school principal to review the activity to align with local school procedures.
- Schools take over responsibility and duty of care for the student once they enter the school premises.

For Privacy issues, P&C are to maintain all documentation

Making a decision

- After examining all considerations and additional specific factors it is recommended the organiser check for ongoing safety and risk management as evidence to support the decision to proceed with the Cycling School Bus initiative.
- Communicate all decisions with the school Principal.
- Contact your <u>Road Safety Education Officer</u>, <u>local council</u> and/or the <u>Parents and Community</u> <u>Association</u> for further assistance.
- Review <u>safe travel advice</u> for cycling and Transport for NSW's <u>Safety Town</u> for advice for families.

Considerations to be made by the organisers

Organisers are to consider the unique aspects of each *Cycling School Bus* and tailor their strategies according to their local contexts, such as local roads, condition of footpaths. These considerations are a guide and not designed to be used as a definitive checklist.

Planning

Volunteers and supervisors:

- have a Working with Children Checks for Volunteers
- are given access to training and resources to support them in the role
- are provided with:
 - a) knowledge of safe road user behaviours and management practices
 - b) expectations of the role
 - c) routes/timetables and safety procedures.

Management of permission and attendance

Parental permission notes:

- received for all students who travel on the Cycling School Bus
- stored and shared with the school, so students can be released to the volunteers of the program after school.
- provide conditions to be part of the Cycling School Bus proficient riding ability, always wear a helmet when riding, good maintenance of their bicycle.

Procedures developed for:

- management of attendance lists and absent/late students and new students.
- when absences/late/unavailability of bus 'drivers' and supervisors
- management of behaviour issues of bus 'passengers' in the traffic environment; bicycle repairs; walking the bicycle across the pedestrian crossings, etc
- volunteer to student ratio clearly defined
- wet weather, changes in routine, emergency procedures and clearly communicated.

Route

- Risk assessment of the route to be developed by organising group.
- Route, distance, time, direction and crossing locations communicated to school and school community.
- Routes are regularly reviewed to evaluate safety.
- Hazards communicated to volunteers and students.

Some possible strategies to assist volunteers

- Carry communication devices and first aid kit, carry mobile phones, or walkie talkies if mobile reception is poor.
- Be given a direct contact for parents/the school to call
- What to do in the event of an emergency?
- School bus 'drivers' wear high visibility vests
- Clear communication channels developed around routes/timetables and procedures. These are readily
 accessible to the whole school community
- Key cycling safety messages are provided to and reinforced by parents/carers, students, staff and the cycling school bus drivers and supervisors.

Add any other considerations you will need to discuss with your parent community
